

- Conductive Polymer Hybrid Aluminum Electrolytic Capacitors
- Low ESR, high ripple current capability, Large Capacitance 105°C, 5000 hours.
- AEC-Q200 Compliant
- RoHS Compliant

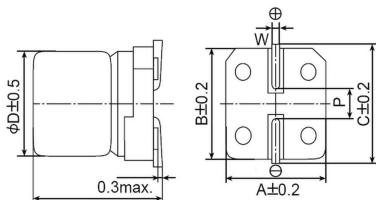

## Specifications

| Items   | Characteristics                                      |           |   |  |
|---|--|-----------|---|--|
| Category Temperature Range                            | -55 to +105°C  |           |   |  |
| Rated Voltage Range                                   | 25 to 80Vdc  |           |   |  |
| Capacitance Range                                     | 33 to 680μF  |           |   |  |
| Capacitance Tolerance                                 | ±20% (M)   |           |   |  |
| Surge Voltage   | Rated Voltage(V) × 1.15                              |           |   |  |
| Dissipation Factor (tanδ)                             | Please see the attached ratings list                 |           |   |  |
| Leakage Current <sup>*1</sup>                         | Please see the attached ratings list                 |           |   |  |
| Equivalent Series Resistance (ESR)                    | Please see the attached ratings list                 |           |   |  |
| Temperature Characteristics<br>(Max. Impedance Ratio) | Z(-55°C)/Z(+20°C) ≤ 2.0<br>Z(-25°C)/Z(+20°C) ≤ 1.5   |           |   |  |
| Endurance   | 105°C, 5,000h<br>AC+DC≤Rated voltage applied         | △ C/C     | ≤ ±30% of the initial value                             |  |
|   |  | DF (tanδ) | ≤ 200% of the initial specified value                   |  |
|   |  | ESR       | ≤ 200% of the initial specified value                   |  |
|   |  | LC        | ≤ The initial specified value                           |  |
| Damp heat(Steady state)                               | 85°C, 85 to 90%RH<br>2,000h<br>Rated voltage applied | △ C/C     | ≤ ±30% of the initial value                             |  |
|   |  | DF (tanδ) | ≤ 200% of the initial specified value                   |  |
|   |  | ESR       | ≤ 200% of the initial specified value                   |  |
|   |  | LC        | ≤ The initial specified value(after voltage processing) |  |
| Resistance to soldering heat                          | Reflow method<br>(260±5°C × 5s)                      | △ C/C     | ≤ ±10% of the initial value                             |  |
|   |  | DF (tanδ) | ≤ The initial specified value                           |  |
|   |  | ESR       | ≤ The initial specified value                           |  |
|   |  | LC        | ≤ The initial specified value(after voltage processing) |  |

<sup>\*1</sup> In case of some problems for measured values, measure after applying rated voltage for 120 minutes at 105°C.

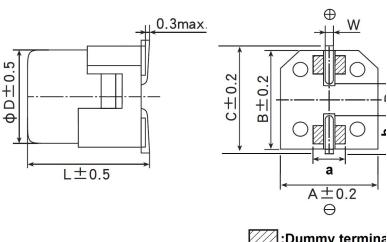

## Dimensions

Nominal
